

Volunteers Needed for COVID-19 Vaccine Research Study

Are you planning to have a COVID-19 vaccination?

You have the opportunity to be a part of a **new study** led by WA clinicians and scientists that will **help us understand COVID-19 immunity**.

We are **recruiting people who are planning to have a COVID-19 vaccination** to provide blood samples and health information to the Western Australian COVID-19 Collaborative (WACIC) Biobank over a period of two years.

The **WACIC Biobank** will be used to **investigate how immunity to the SARS-CoV-2 virus develops, how long it lasts, and to develop diagnostic laboratory tests** to demonstrate whether someone is immune to COVID-19.

If you are interested, you would be asked to **attend eight visits at Fiona Stanley Hospital over a period of two years**, the first being prior to receiving your COVID-19 vaccination.

For more information and to register your interest please contact us at WACIC@health.wa.gov.au or scan the QR code
