

Non-invasive Prenatal Testing (NIPT) Harmony™ Test Information for Patients

Your doctor will explain what the Harmony™ (NIPT) test is for and how it works. The following information is provided to assist you in electing to have the NIPT done at PathWest.

Your test will only be carried out with all Essential Information completed on the request form. Before leaving the surgery, please check that your doctor has filled in all the details required and that you and your doctor have signed the form.

Your blood sample will be sent to Sonic Genetics where the testing will be carried out. For further information about the Harmony™ test please see our website: pathwest.com.au or harmonytest.com. PathWest locations are listed overleaf including opening times and contact details.

How does the NIPT process work?

1. Your doctor will explain the significance of the test and whether it is appropriate for you.
2. Please read and sign the Informed Consent section on the request form, instructing us that you have received advice from your doctor and give your consent to have the test performed.
3. Your doctor is also required to complete and sign ALL Essential Information sections of the request form.
4. To know the sex of your child, please ask your doctor to complete this section. This will only be done if requested by the doctor.
5. Take your signed and completed form to your nearest PathWest collection centre. Your blood will only be collected if all of the above information is completed. Please check the request form prior to visiting a PathWest collection centre.

The Harmony™ NIPT test costs \$425.00 and payment via Eftpos must be made at the collection centre prior to the sample being collected. There is an additional charge of \$70 for the optional 22q11.2 test.

Test results are available within 5-8 working days. PathWest will forward the results to your doctor and your doctor will then communicate the result to you.

In a small percentage of cases, the sample collected will not contain enough of your baby's DNA to provide a reliable test result, which will not be known until the test is analysed. You will then be asked to provide a new sample at no extra charge to you.

Disclaimer: This test is performed by Sonic Genetics in Queensland. All care is taken when collecting and transporting the specimen, however PathWest is not responsible for transportation strikes or delays, or public holidays causing delays either in WA or Queensland.

Non-invasive prenatal testing based on cell-free analysis is not diagnostic: results should be confirmed by diagnostic testing. Before making any treatment decisions, all women should discuss their results with their healthcare provider, who can recommend confirmatory, diagnostic testing where appropriate.

PATHWEST HARMONY NIPT COLLECTION CENTRES - METROPOLITAN

MONDAY TO FRIDAY
